

PUBLIC NOTICE OF NETWORK CHANGE UNDER RULE 51.329(A)

April 5, 2023

Carrier: Whidbey Telephone Company (dba Whidbey Telecom)
14888 SR 525
Langley, WA 98260

Contact: For additional information on these planned network changes, please contact:

Michelle Pardee
Project Manager
14888 SR 525
Langley WA 98260
Phone: +1 360 321 0105

Implementation Date: Beginning April-2023, projected through December-2025

Planned network change(s) will occur in the south Whidbey and Point Roberts service areas. The lists of affected addresses are included in the attached Exhibits.

Whidbey Telecom's copper retirement notice(s) may be viewed on our website at <https://www.whidbeytel.com/legal-notices-tariffs/>.

Network Change Description:

Whidbey Telecom intends to retire its copper facilities throughout its local service area(s). Whidbey Telecom has upgraded or plans to upgrade its copper network facilities to fiber optics and to install its fiber-to-the-home/premise network in phases over time. Each phase will cover a specific service area, or "fiber-hood."

Current infrastructure and equipment have reached or are approaching their end of life. Updating our network to fiber optics provides our customers with the most dependable, up to date, and fastest network available. Fiber optics also provides our customers with

PUBLIC NOTICE OF NETWORK CHANGE UNDER RULE 51.329(A) (continued)

the opportunity to expand their bandwidth to accommodate current and future household or business demands and needs.

Planned Changes and Impacts:

The network upgrade process will include the installation of fiber optics to a customer's premise within a fiber-hood and migrating the service(s) of active customers off the copper facilities onto the fiber optics facilities.

This network upgrade and migration to fiber optics facilities does not affect or have any impact on Whidbey Telecom's interoperability with other telecommunications service providers and will not affect a competing service provider's performance or ability to provide service.

The migration off the copper facilities onto the fiber-optics facilities in a specific fiber-hood will progress from one service address to another. This will result in customers migrating prior to the retirement of that portion of the copper network. Once Whidbey Telecom has completed the fiber optics upgrade in each fiber-hood, and the copper facilities are retired, Whidbey Telecom will no longer offer nor activate services over the copper facilities and will cease to maintain the copper facilities as well.

EXHIBIT A-1**WHIDBEY TELECOM - BAYVIEW 3 FIBER-HOOD - SERVICE ADDRESS LIST**

The following service addresses within this Fiber-hood are fiber-ready. Any of these service addresses with active services during this Fiber-hood's migration process will have the active services migrated from the Copper network facilities onto the Fiber-optics network facilities. Service installation/change requests received for any of these service addresses during the migration process, or after the migration process has been completed, for this Fiber-hood will be deployed on the new Fiber-optics network facilities. This address list is subject to change. Last revision date - 03/23/2023.

EXHIBIT A-24**WHIDBEY TELECOM - WILKINSON ROAD 1 FIBER-HOOD - SERVICE ADDRESS LIST**

The following service addresses within this Fiber-hood are fiber-ready. Any of these service addresses with active services during this Fiber-hood's migration process will have the active services migrated from the Copper network facilities onto the Fiber-optics network facilities. Service installation/change requests received for any of these service addresses during the migration process, or after the migration process has been completed, for this Fiber-hood will be deployed on the new Fiber-optics network facilities. This address list is subject to change. Last revision date - 03/23/2023.
